CTI Technical Information Bulletin

September 24, 2008

Cris Crapo with **Growth Enhancer** reports that Brad Fox, the superintendent at *Green Meadows* in Alcoa, TN is “tickled pink” with CTI products. Back in July Brad got 6 dozen of our 5/16 X 10” solid deep tines to use on his Wiedenmann machine. His comment was, “these things are awesome” *and* that they lasted far longer than the tines he had been getting from Wiedenmann.

Brad just finished using our 5/8 X 5” side-eject coring tines (1CS-625075) and continues to be extremely pleased. Brad says that they are “made too good” and he will not have to buy as many from now on! He told Cris, “you have a customer for life”. Clearly, this is the type of committed customer that we all want.

Cris sent the attached photo to show the ‘most worn’ tine after 11 greens as compared to an unused one. Brad is very pleased since the tine only lost 1/8” inch after 11 greens.

The aerification season is coming to an end but many courses have still not finished due to the early rain. Please continue to seek new business – every new order this year will likely be a committed customer next year.
